(HILLS OF SNOW)

THE KING OF ALL SHRUBS

New Hydrangea Arborescens Grandiflora Alba or "Hills of Snow." The Most Valuable Shrub Ever Introduced.

Price, nice young plants, strong and healthy, 15 cents each, or four for 50 cents. Strong, field grown plants, two years old, 30 cents, four for \$1.00; three-year-old, 50 cents each.

AUTUMN SEASON

1911

To succeed with bulbs it is necessary to begin right, by getting sound bulbs of good size, and we would warn intending purchasers against buying cheap, undersized bulbs and expect the fine results obtained from such as we offer. Our sources of supply are the best in this country and abroad, the leading growers of the world having for years supplied us with their choicest stock.

There is no class of plants so much prized as those which are produced from bulbs. Closely following the disappearance of snow and long before ordinary outdoor flowers are in bloom, we may have, in their perfection, the hardy Snowdrop and Crocus; then the fragrant and stately Hyacinths; a little later the varied and brilliant Tulips and the magnificent varieties of Narcissi. These give an air of distinction and refinement to any lawn or garden, affording much pleasure to all who pass by. We send with every order full directions for both garden and indoor culture.

French Roman Hyacinths

FOR EARLY WINTER BLOOMING, Roman Hyacinths will give the greatest satisfaction. Exquisitely fragrant, the flower spikes are lovely and graceful in the extreme. The bulbs can be grown in soil, water or pebbles, and are sure to bloom. When grown in pots they should be well watered after potting, then placed in a dry, cool place, such as a cellar, and not brought out until the roots have made a good growth. In water or pebbles, treat the same as Chinese Sacred Lily. Hardy in the ground south of Washington, D. C. Don't fail to plant a quantity of them.

The bulbs here offered are the true French stock, imported by us direct from the growers and measure from twelve to fifteen centimeters in circumference.

SINGLE WHITE—Elegant, fragrant, waxy-white flowers, of surprising beauty.

SINGLE BLUE—Extremely pretty, and in novel contrast with all other varieties.

SINGLE PINK—Fine flowers of a beautiful blush-pink color.

Price, 5 cents each; twelve for 50 cents, postpaid.

Feathered Hyacinth.

Feathered or Cockade Hyacinths

A real curiosity. First, a frizzled cockade-like spike an inch or two in length appears above the soil, and as it slowly rises on its long stalk it becomes five or six times as long as at first, developing into a long, leathery, blue plume, and lasting for weeks in that condition. One of those pretty, odd things that everybody likes. Perfectly hardy in the garden and fine for pots. Price, two for 5 cents, six for 12 cents, twelve for 20 cents.

Grape Hyacinth.

Grape Hyacinths

One of the sweetest little flowers imaginable, and in masses very striking, making a wave of intensest blue that captures every eye. As hardy as an oak and increases rapidly. Its spikes are just the size for button-hole bouquets, while its long stem enables it to be used to advantage in all bouquets or cut flower work. We offer them in white and blue.

BLUE—Price, four for 5 cents, 15 cents per dozen.

WHITE—Price, three for 5 cents, 20 cents per dozen.

DUTCH

HYACINTHS

Large, Selected, Perfect Bulbs of Finest Quality

For winter and early spring flowering nothing surpasses the Hyacinth. It is sure to bloom and give satisfaction in the house during winter or in the garden in early spring. Its large spikes resemble nothing else in cultivation. Rather than offer a long, confusing list of varieties, we have carefully selected twelve each of Singles and Doubles, embracing all the shades of this beautiful flower, each one being the largest, strongest and best of its color.

Twelve Best Named Single Hyacinths

We consider the Single Hyacinths more useful and valuable than the double varieties. They are better for forcing, more vigorous in growth, and produce stronger spikes of bloom, which are generally of better substance.

King of the Blues—Rich dark blue, the finest of the deep blues; extra large, well furnished, broad spikes with large bells; erect and fine for pots.

Early Flowering Named Tulips

The Tulips we offer are among the most perfect of flowers in form, wealth of color and variety of markings, and are all imported direct from the best growers in Holland, with whom we contract many months in advance. The culture of Tulips is the same as that of Hyacinths, except that the bulbs should be planted about three inches deep and four to six inches apart. Tulips are perfectly hardy, so only a slight protection is required from extreme cold and sharp winds.

NOTE—The varieties marked with a * are equally good for pot culture and for bedding. The letters D, M or T indicate the comparative height when grown out of doors, whether Dwarf, Medium or Tall.

Superior Set of Eight Extra Fine Early Tulips

We here offer a set of eight Superior Tulips specially selected by one of our Holland bulb growers. Each one is a gem of special merit and all are of recent introduction. Of course the cost is a little more, but we believe you will find them well worth it. Let us send you a set of these superb Tulips. Price, 35 cents for full set of eight; 20 cents for any four. LATE OR MAY FLOWERING "Decoration Day" Garden Tulips

These superb Tulips are becoming immensely popular. Planted in large clumps or groups, they present a gorgeous appearance, the flowers much larger than ordinary Tulips, of beautiful form and splendid substance, produced on long, strong stems. Blooming, as they do, about Memorial Day, when the early-flowering Tulips are on the wane, they are always indispensable. Further, they are extremely hardy, and once planted, are permanent and continue to be a source of delight year after year.

Our collection embraces all the best types of the Garden Tulip and your order should include at least a few of these most satisfactory bulbs.

Leading Varieties of Garden Tulips

Gesneriana Spatulata—The grandest Tulip in existence. Tall growing and late blooming, with large, long leaves and tall, erect flower stalks, which support great waxen blooms, larger than teacups, of the most vivid, glossy coral-red, each flower showing a deep blue-black blotch at the base that further enhances its beauty. They remain in bloom a long time. Price, 4 cents each; twelve for 35 cents.

Ida (The Golden Beauty)—Rich, deep golden-yellow; a large, long-stemmed, globular flower of finest substance; fine bedder and unequalled for cutting. Price, 3 cents each; six for 15 cents.

Golden Crown—Exactly like the Gesneriana, except its grand blossoms are of a fine yellow color, banded with bright red. Forms a superb contrast with the scarlet Gesneriana. Price, 3 cents each; six for 15c.

Isabella (Blushing Bride)—Opens creamy-white with crimson-rose border, turns rosy-pink, never looks faded, color keeps changing all the time, flower of immense size, largely used for outside, but can be forced by middle of February. This is one of the most useful Tulips. Price, 4 cents each; six for 20 cents.

Picotee (Maiden's Blush)—This is one of the finest of late Tulips, pure white, with brilliant rose edging, large flower on stout stem. A dainty flower of exquisite beauty. Price, 3 cents each; six for 15 cents.

White Crown—Large white reflexed petals margined rosy-red, a very attractive flower. One of the finest. Price, 4 cents each; six for 20c.

They by far surpass in color and brilliancy anything before known in Tulips. They include almost every conceivable color and shade, from the faintest blue to the darkest violet, from soft rose to the most brilliant red, and from light brown to what is believed to be the darkest black in the floral world.

Gretchen (Margaret)—Cup-shaped flower of a most delicate flesh color, the most popular of all the Darwins, medium height.

Narcissus, Daffodils and Jonquils

Among spring flowering bulbous plants the Narcissus family—which includes Daffodils and Jonquils—is one of the most important and of world-wide popularity. The Narcissus are now in the front rank of popularity and they certainly merit all the praise that can be given them, for there are no hardy bulbous plants that have more points of merit than the Narcissus. The Narcissus, in its different forms, is one of the most interesting of spring-blooming flowers. They are all exquisitely fragrant, while the great variety of peculiarly graceful forms which they assume in their numerous species and varieties is peculiarly agreeable and fascinating. They are mostly hardy bulbous plants, natives of southwestern Europe and the Mediterranean region, and are flowers of antiquity, romance and poetry. Excepting the Polyanthus varieties, offered on next page, they are perfectly hardy, even in the northern states; growing and doing well in almost any and every position, in sun or shade, moist or dry, and are capable of being naturalized in cool, grassy places. They will succeed best, however, in a thoroughly drained, tolerably rich soil. If the position is one partially shaded from the hot sunshine in the spring, the flowers will retain their beauty for a much longer period than if more exposed.

Trumpet Major.

Ajax Princeps—Very early. This is one of the most popular winter-flowering and forcing varieties grown. Flowers large, perianth sulphur, with an immense rich yellow trumpet. Price, 4 cents each; six for 20 cents.

Albus Stella—One of the first in flower and wonderfully free blooming. White, star-shaped flowers three inches across, with bright yellow cups; very beautiful and one of the most popular forcing and cutting varieties. Price, four for 10 cents; 25 cents per dozen.

Golden Spur—Large, spreading, full, deep yellow perianth, trumpet golden-yellow. A charming, richly-perfumed flower, and one of the very best of the Golden Trumpets. In favorable situations the flower stalks attain a height of two feet. Price, 5 cents each; six for 25 cents.

Mrs. Langtry—Flowers pure white, star-like. Cup at first slightly tinted, but changes to pure white. Very pretty, exceedingly sweet-scented. A very free bloomer, being fine for forcing as well as for bedding and open ground culture. Price, 4 cents each; six for 20 cents.

Trumpet Major—Flowers large and almost of a uniform deep golden. Highly prized as an early forcing sort and largely planted for outside bedding. Price, 4 cents each; six for 20 cents.

Victoria Bicolor—Perianth snow-white, trumpet rich yellow, serrated and flanged at the edges, large in outline, and of rare beauty for cutting. Price, 5 cents each; six for 25 cents.

HOOP PETTICOAT NARCISSUS

(*Bulbocodium*.) A great oddity, nearly all trumpet, which flares in such a manner as to suggest the name. Each bulb bears several flowers, and a pot containing several bulbs is a pretty sight. Bright yellow. Price, 4 cents each; six for 20 cents.

DOUBLE DAFFODILS

Double Von Sion—The grand old-fashioned double yellow Daffodil—extra fine for cutting. Single, star-like perianth, and long, double trumpet, filled with beautifully crimped petals. Deep golden, very hardy outside, and blooms freely in pots in the house. Everybody should plant this one, sure to bloom anywhere and everywhere. Price, 4 cents each; 40 cents per dozen.

Alba Plena Odorata—"The Double White Poet's Narcissus or Gardenia-Flowered Daffodil." Double snow-white, Gardenia-like flowers, exquisitely scented. Price, two for 5 cents; 25 cents per dozen.

Incomparable, fl. pl.—"Butter and Eggs." Full double flowers of rich yellow, with orange nectary, splendid variety for either forcing for winter cut flowers or for open ground planting. Price, three for 10 cents; 25 cents per dozen.

Orange Phoenix—"Eggs and Bacon." Beautiful double white flowers, with orange nectary. Splendid for pot culture and cutting or garden decoration. Price, 4 cents each; six for 20 cents.

Sulphur (or Silver) Phoenix—"Codlins and Cream." Large creamy-white double flowers with sulphur nectary. Exquisite corsage flower, and fine for growing in pots. Price, 5 cents each; six for 25 cents.

THE TRUE POET'S DAFFODILS

NARCISSUS WITH MINIATURE SAUCER-SHAPED CUP

Ornatus—The improved "Poeticus," large, beautifully-formed, pure white flowers, with saffron cup, tinged with rosy-scarlet. A magnificent cut flower. Very early. Price, 3 cents each; 30 cents per dozen.

Poeticus—The "Pheasant's Eye," or "Poet's Narcissus," pure white flowers with orange cup edged with crimson. Splendid cut flower. Price, four for 10 cents; 25 cents per dozen.

Double Von Sion.

POLYANTHUS NARCISSEUS

Or Bunch-Flowered Daffodils.

The Polyanthus varieties of Narcissus are not only beautiful but deliciously sweet-scented, and of the easiest culture, suitable for window garden, conservatory or garden, very free flowering and continuing long in bloom. Their tall spikes of bloom bear from six to one dozen flowers each. The pure white petals and gold cups of some varieties, the yellow with deep orange cups of others and the self whites and yellows render them great favorites. They are not quite so hardy as the other types of Narcissus and therefore should be carefully protected in cold climates when grown in the garden. South of the freezing belt they are splendid for gardens.

Paper-White Grandiflora

This is the earliest of all, blooming by Christmas, and with its long-stemmed clusters of starry-white flowers—much larger than the old variety—is indeed most beautiful; very fragrant also. This variety is perhaps more largely forced for cut flowers than any other, millions of them being used for the large flower markets of the world. Price, 4 cents each; six for 20 cents.

Early Double Roman

A splendid sort, good grower, with tall stems and fine clusters of extra large flowers. Outer petals creamy-white. Center of flowers filled with small white and deep orange petals, while the whole flower is so sweet that one cluster will perfume a whole room. Price, 5c each; six for 25c.

Grand Soliel d'Or

A charming rich yellow flower with deep reddish cup. Thousands of this variety are grown in Sicily Isles for sale in the London market. Flowers are almost identical with the Chinese Sacred Lily except in color, and may be grown in water like the Chinese variety. Price, 6 cents each; six for 30 cents.

Grand Monarque

Large pure white, with lemon cup; extra fine. This variety is one of the finest of all Polyanthus Narcissus. Price, 6 cents each; six for 35c.

Set of one each of the above named Polyanthus Narcissus for 20 cents, two of each for 35 cents.

Narcissus Jonquilla, or Jonquils

Much prized for their charming golden and deliciously sweet-scented flowers; perfectly hardy, and flowering very early in the spring. Admirably adapted for winter forcing.

Single Jonquil—The well-known favorite, delicately scented and beautiful for forcing. Rich yellow, very fragrant. Price, three for 5 cents; 15 cents per dozen.

Double Jonquil—Heads of small but very double deep golden-yellow flowers, powerfully scented and good for forcing. Price, 3 cents each; 30 cents per dozen.

Campanelle—Large, six-lobed yellow flowers, four to six on a stem; fine for forcing, and the one generally preferred by florists. Price, three for 10 cents; 25 cents per dozen.

CHINESE SACRED LILY

Oriental Lily or "Joss Flower"—The most satisfactory of all winter-blooming bulbs. No home should be without one. Nothing is easier cared for or gives as great abundance of deliciously-scented bloom. Fill a bowl or similar vessel with pebbles, in which place the bulb, setting it about one-half its depth, so that it will be held firmly, then fill with water to the top of the pebbles, and place in a warm, sunny window. The bulb will at once commence rapid growth and bloom in four or five weeks. The bulbs are so large and have so much vitality they can be kept perfectly dry all winter and be planted at any time when the flowers are desired. Price, extra size, 15 cents each; two for 25c. **NOTE**—Bulbs offered are large, solid and well matured. Can be relied upon to be true Chinese, superior to those grown elsewhere.

CROCUS First Gay Flowers of Spring

Large Flowering Varieties

Beautiful for growing in pots, among the EARLIEST to bloom on the lawn in the spring.

Among all the pretty flowers of spring, none is greeted with a heartier welcome than the Crocus. Their flowers are lovely in form, and of the brightest colors—pure white, golden-yellow, purple, pink and variegated. They are entirely hardy and like a rich, dry soil and sunny location. They are suitable for planting in beds and borders, also for edging in ribbon lines of any desired color, for planting in the grass in lawn or yard. Crocus are also very highly valued for house culture. They bloom very quickly and are so cheap that all can afford to have them. Ours are the improved strains, noted for large flowers and brightest colors. Plant in October or November.

Directions for Planting

With a trowel or spade make a slanting opening about two inches deep, put in the bulb, then with the foot press back the sod. This is an easy way to plant flowers that will be a sheet of bloom almost before the grass is green. They will care for themselves, blooming early amid the grass, and dying down to the bulb in ample time to be entirely out of the way of the lawn mower.

Choice Named Giant Flowered Dutch Crocus—Extra Large Bulbs

The following named varieties are especially adapted for pot culture because of their large, vigorous bulbs. Price, 10 cents per dozen, 75 cents per hundred postpaid.

Cloth of Gold—Brightest golden-yellow.

Cloth of Silver—Silvery-white, striped lilac, small flowers, but very profuse.

Purpurea—Extra large, dark purple.

Mont Blanc—Large and fine white.

Sir Walter Scott—Elegantly white striped.

Yellow Mammoth—All large bulbs, each producing a number of large, golden-yellow flowers.

CROCUS in colors: White, blue, striped, yellow or all colors mixed, 8c per doz; 50c per 100, postpaid.

Scilla Sibirica.

Scilla Sibirica

The Siberian Scilla, or Squill, has flowers of a lovely ultramarine blue color, borne in graceful spikes. In the house it blooms early, like the Roman Hyacinths, and forms a beautiful contrast with them. In the open ground they are quite hardy, and especially fine planted in small beds or with Snowdrops, and, like them, frequently blooming before the snow has gone. Price, 2 cents each; 20 cents per dozen.

Scilla Alba

This has exactly the same flower as *Scilla Sibirica*, excepting that it is pure white. Price, 2 cents each; 20 cents per dozen.

Chionodoxa Luciliae (Glory of the Snow)

These bulbs are very popular, and deservedly so, for their lovely blue and white flowers, produced in long sprays, are seen

in the garden among the earliest spring flowers — sometimes even before the snow has disappeared. The bulbs are perfectly hardy and make a fine display when planted in masses outdoors. For window culture they are fully as charming as are Freesias. They bloom very early, commonly by Christmas. Selected bulbs.

Price, 3 cents each; 25 cents per dozen.

If Bulbs go by express, not prepaid, you may select 20 cents extra for each \$1.00.

OXALIS

An unrivaled winter flowering pot plant of the easiest culture, succeeding with everybody.

Winter blooming Oxalis are always sure to please. Plant five or six bulbs in a six-inch pot. They commence growth immediately after planting and need not be set away to form roots like most other bulbs.

The Grand Duchess Oxalis

There is no doubt about its being one of the most beautiful and taking winter flowers it is possible to have. Blossoms immense, three inches across, borne well above the foliage; leaves large, clover-shaped and handsome. A most persistent bloomer, remaining constantly in flower from November to June. We have three colors to offer, bright pink, lavender and pure white.

Grand Duchess Pink—Enormous size, bright rosy-pink. Finest recent novelty, and has been widely advertised.

Grand Duchess White—New; pure snow-white. A grand contrast to the above.

Lavender—A fine large flower of a unique lavender color. Plant has a branching habit, not so compact as the white or pink.

Price, three for 10 cents; six for 15 cents; or 25 cents per doz.

Bermuda Buttercup Oxalis

A fine, robust-growing, large flowering sort from Bermuda. Blooms in enormous panicles, each flower being as large as a silver half-dollar, and of a clear, bright yellow color. Easily grown in any window and a most satisfactory winter bloomer. Price, four for 10 cents; 25 cents per dozen.

Other Oxalis

PRICE, FIVE FOR 10 CENTS; TWELVE FOR 20 CENTS.

Multiflora Alba—A good sort, producing pure white blossoms. **Bowiei**—Extra large, brilliant red blossoms and luxuriant foliage. One of the very best.

Cernua—Very large yellow flowers, in clusters, an extra sort.

Versicolor—The prettiest of all. Beautiful foliage and compact growth, with an abundance of large, pearly-white blossoms, each petal having a wide border of brilliant scarlet.

MIXED OXALIS—Containing a large number of varieties. Price, 10 cents per dozen.

GIANT SNOWDROPS

The Charming Snowdrop is One of the First Flowers to Herald the Approach of Spring.

It can frequently be seen in bloom when the ground is white with snow, as it takes every advantage, and hastens to display its graceful, snow-white bells before winter has disappeared. In conjunction with Chionodoxa and Scilla, a matchless effect can be produced. As the bulbs are small, they should be planted liberally in order to obtain immediate results. Banks, grassy slopes, edging, or rock-work will suit all of these bulbs. They should not be disturbed often if a fine display is desired.

Double Snowdrop—(Galanthus Nivalis, fl. pl.) Flowers perfectly double, pure white. Price, two for 5c; 20c per dozen.

Giant Single Snowdrop—(Galanthus Elwesii.) The largest and most beautiful, flowers snow-white, with emerald-green tube. Price, three for 5 cents; 15 cents per dozen.

Camassia Esculenta (Mountain Hyacinth.)

A fine hardy plant, thriving best in a partially-shaded situation. Produces beautiful spikes two feet tall, which bear twenty or more clear, rich blue flowers. Fine either to bloom in the house in winter or in masses in the garden in early spring. Price, 2 cents each; 20 cents per dozen.

If Bulbs go by express, not prepaid, you may select 20 cents extra for each \$1.00.

Allium and Triteteleja.

ALLIUMS

Allium Neapolitanum—Another excellent variety for winter flowering, now extensively forced by florists for cut flowers, being of pure white with green stamens, borne in large, loose umbels. Height 15 to 18 inches. Price, three for 5c; twelve for 20c.

Highly ornamental winter, spring and summer flowering plants, having both single and double flowers, the colors of which are wonderfully beautiful, running through shades of blues, scarlet, rose, white, lavender, etc. For cutting they are grand. They are splendid for pot culture, flowering in the house or conservatory. Four roots to a five-inch pot, kept cool and secluded until growth appears, will produce handsome decorative specimens for winter use. They are not quite hardy; planted from October to November, they will bloom in early spring, but need covering with litter during winter for protection.

Anemone, Single—Mixed; brightest colors. Price, two for 5 cents; 20 cents per dozen.

Anemone, Double—Mixed; best assortment of colors. Price, 3 cents each; 25 cents per dozen.

Ixias.

IXIAS

The graceful flower spikes of the Ixias remind one of Gladiolus, but the flowers are very distinct, being round and well opened. Their brilliant colors and vividly contrasting markings have made them quite popular. For pot culture, plant six in a five-inch pot, and treat as Hyacinths. For outdoor culture they should be planted in a somewhat sheltered situation and protected with leaves or straw.

Mixed Sorts—Many varieties of rich shades and colors. Price, three for 5 cents; 15 cents per dozen.

Iris—Flowering Flag.

IRIS

FLOWERING FLAG—FLEUR-DE-LIS

Hardy spring and summer-blooming plants, bearing large, rich and various colored flowers. The tubers or bulbous-rooted kinds do not require a rich soil, but a sandy loam will suit them well. The English and Spanish varieties should be planted out in clumps where they may be seen to advantage. The crown of the bulb must not be more than three inches below the surface.

ENGLISH IRIS

Our collection embraces a full range of color, from a very deep purple to a very pure white. Mixed. Price, two for 5 cents; 25 cents per dozen.

SPANISH IRIS

This variety is well adapted for pot culture, blooming in the winter earlier than the above, but smaller; beautiful shades of violet, yellow, blue and white. Mixed varieties, three for 5 cents; 15 cents per dozen.

Turkish or Turban Ranunculus

For beauty and grace of form and brightness of colors the Ranunculus is unsurpassed. These attractive qualities have made it a prime favorite. The Ranunculus require careful culture, and are worthy of it. The plants should not be exposed to a hot, dry air, nor to a blazing sun. The soil should be rich and not too dry, and yet well drained. Price, 2 cents each; 20 cents per dozen.

Sparaxis

Resembles Ixias, but flowers are more drooping, opening flatly. Their combination of beautiful and unusual colors is fascinating. The individual flowers are very large, and the brilliant colors are striped and splashed in every imaginable manner. Fine mixed, all colors, three for 5c; 15c per dozen.

Freesia.

Winter-Blooming Freesias

Freesia Refracta Alba—No description can do adequate justice to this beautiful plant. The flowers are two inches long and about the same in width, shaped like miniature Gladioli and borne in clusters of six to ten. The body of the flower is pure white, with lower segments spotted lemon-yellow. The perfume is most delicious, being a mixture of Mignonette, Violet and Jasmine, and one plant is sufficient to perfume a large room. The plant has tooth-shaped bulbs and flat, spreading leaves. Its cultivation is the simplest, requiring only to be potted in October, to be watered sparingly at first, placed in a sunny window and watered more as growth progresses. When out of flower, store in some place and repot at proper season in fresh soil for another year's growth. Six fine selected bulbs for 15 cents; twelve for 25 cents.

Early-Flowering Gladiolus

Communis Rubra—This Gladiolus is invaluable for flowering in the greenhouse for winter bloom. The flowers are smaller and more refined than those of the Gandavensis Gladiolus; the color is a pretty violet, very handsome; the bulbs can be kept dormant until spring and then be planted in open ground if preferred, blooming in June and July. If planted in cold frames they will flower as early as May, and this is perhaps the better way in very cold localities. Price, 4 cents each; 40 cents per dozen.

Triteleja Laxa

A most valuable addition to winter flowering bulbs for house culture. Several bulbs can be planted in a four or five-inch pot; each will send up numerous flower stalks, producing exquisite, star-shaped blossoms; beautiful dark blue. The flowers follow each other successively, and a pot or basket of these bulbs presents a lovely blooming appearance all winter. This variety is also entirely hardy; can be planted in open ground, blooming in spring. Fine bulbs, 2 cents each; 20 cents per dozen.

Great Surplus Bulb Collections

Sent Only After November 10th.

In importing enormous quantities of bulbs from Holland, France, China, Japan, Bermuda, etc., we find it impossible to estimate what the exact demand will be, and to order just the right quantity of each variety, so that we usually have a surplus of many varieties, including the very choicest and most expensive. As they cannot be kept over, we must close them out at the end of the season, and offer them to our patrons in collections, strictly of our own selection, at a big sacrifice rate.

These collections may be ordered at any time, but will not be sent until the rush of trade is over, about November 10.

Surplus Bulb Collection No. 1.—For 50 cents postpaid.

This will consist of a very generous lot of miscellaneous bulbs, of many times the value of price asked, and will be sent by mail, postpaid for 50 cents.

Surplus Bulb Collection No. 2.—By express, not prepaid, for \$1.00.

This will contain a larger proportion of the heavier and more expensive bulbs, of the finest varieties, and will be worth far more than the price asked for it. If express shipment is not desirable, send 25 cents extra for postage.

Either of these Collections will agreeably surprise and please you.

A Word About Express Charges

Some florists are offering to prepay express charges on certain orders, but when so sent the soil is removed from the roots of the plants, and they are packed the same as for mail, the cost of sending being no more than it would be if the plants were sent by the United States mail.

We are willing to send any plant order by prepaid express, provided you are willing to have the plants come to you without soil and that your selection is made strictly in accordance with our Mail Rates.

All plants, except dormant stock, that we send by express, charges to be paid by the purchaser, are packed with ball of soil on the roots, thus insuring their uninterrupted growth when received.

We pack as light as possible consistent with safety, and our customers have the benefit of from twenty to thirty-three per cent. reduction from regular merchandise express rates.

Individual Orders Are Allowed The Same Rates As Club Orders

How to Send Club Orders—Keep each purchaser's order separate, giving his or her full name, with the amount of the order. Then make your selection of the amount due you, naming plants desired as your discount.

How We Pack Our Club Orders—Each person's plants will be packed separately with his or her name attached, so you will have nothing to do but deliver bundle. If the plants are to be sent by mail and you desire them to be sent direct to the person, we will do so when their order amounts to \$1.00 or more.

If plants are to be sent by express, always mention by which Express Company you wish them sent.

OUR "GIANT" COLLECTION OF LARGE TWO-YEAR-OLD EVER-BLOOMING ROSES FOR IMMEDIATE EFFECT

These large Roses have become so popular among our customers that we devote a great deal of room to them, growing them in constantly increasing number.

These bushes are two years old, strong and healthy. They make, of course, more of an appearance from the first than does the smaller stock, having practically a year the advantage in all respects—an advantage for which we find many persons willing to incur the additional expense.

The selection must be left to us, and we will send only strictly high-grade Roses. All will be different and all correctly labeled.

ROSES THAT GROW AND BLOOM

Bouquet of Roses.

Superb Collection of

Ever - Blooming Hybrid Tea Roses

Price, 10 cents each, any six for 50 cents; large two-year-old plants, 25 cents, any five for \$1.00.

Owing to limited space in fall catalogue we cannot enumerate and describe as many varieties of Roses as we do in spring. We can, however, furnish all Roses mentioned in our spring catalogue. As the demand for Roses during the autumn months is largely confined to the finer sorts for house culture during the winter, we therefore devote the following pages to a select list of choice varieties most suitable for the purpose, and that cannot fail to give the most gratifying results. When received the Roses should be planted at once in a three or four-inch pot, in good, rich soil, watered freely and given a warm temperature and as much light and sun as possible. In the spring they may be transplanted in the open ground, where they will continue to bloom throughout the summer.

Fall planting of Roses in open ground is only recommended for the Southern and Pacific Coast States, where the fall and winter is the most favorable time for all kinds of outdoor planting. The kinds here offered are especially recommended for these localities.

"IMPERIAL"

Rose Collection

20 Ever-Blooming Tea Roses for \$1.00

Fine plants from two and a half inch pots (postage prepaid).

They are suitable for flowering in pots in the house during winter, and then in spring plant out in the garden, where they will continue to bloom all summer. If you do not desire them for house flowering, they can (at least in southern latitudes) be planted out in the flower border and covered over lightly with straw, evergreen boughs or any light material, to be removed in early spring. This will give you flowers much earlier than if you waited until spring to plant.

This collection is strictly of our own selection, and we guarantee them to be well-rooted, to reach you in good condition, and to be a fine assortment of colors, all correctly labeled. Many of our very best varieties will be included in the collection.

Marguerite—(The Beautiful Velvet Begonia.) Leaves bronzy-green, somewhat resembling *Metallica*, but growing in more bushy form. Large trusses of light rose colored flowers freely produced.

McBethii—Shrubby in growth, with very deeply indented leaves, which are fine and small. Very free flowering, being constant the year round. A fine summer bedding plant if given light soil and perfect shade. Put it among your Ferns. White flowers, waxy in texture, carried in panicles.

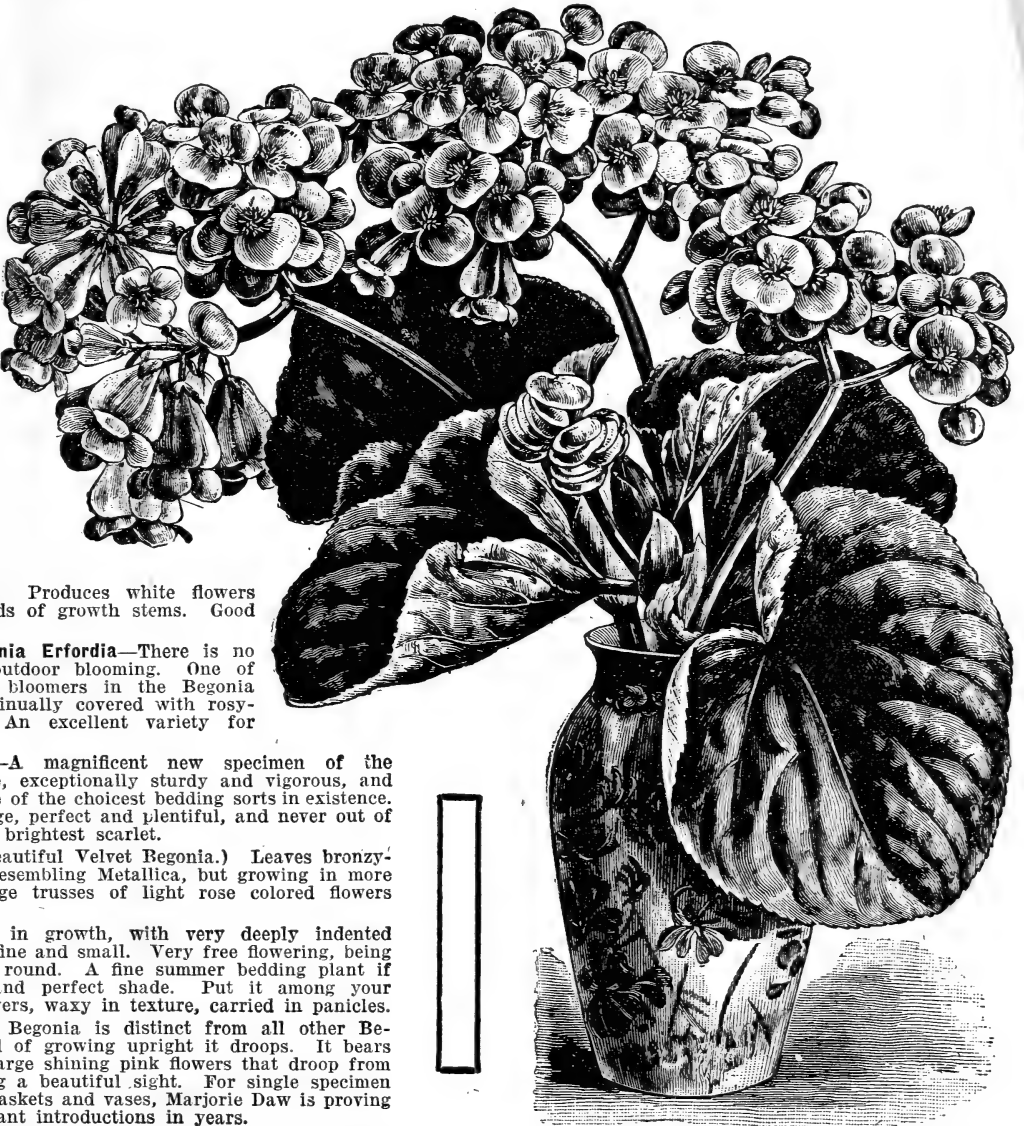

Marjorie Daw—This Begonia is distinct from all other Begonias, for instead of growing upright it droops. It bears great clusters of large shining pink flowers that droop from long stems, making a beautiful sight. For single specimen pot plants or for baskets and vases, *Marjorie Daw* is proving one of the best plant introductions in years.

M. de Lesseps—The leaf is of silky texture, and is beautifully spotted with silver. Very strong, free-growing variety, and will succeed with any ordinary care, growing rapidly and sending out quantities of beautiful white and pink flowers.

Purity—The finest pure white Begonia grown. Its marvelous freedom of bloom and close, compact growth combine to make it one of the finest pot plants. Should be included in every plant collection.

It blooms continually.

Robusta—This is one of the most peculiar Begonias grown. The stock, stem and under side of the leaf are Indian-red; the upper side of the leaf glossy olive-green. The flower is composed of two wide and two narrow petals, the wide ones being broadcast at the base and terminating in a round point, of a beautiful bright rose.

Rubra—This Begonia is still a great favorite. The flowers are a rich coral-red, hanging in large pendent clusters; these, combined with the rich green foliage, make it one of the best plants for house culture.

Sandersoni—Bushy growing variety; glossy deep green leaves; flowers in clusters of drooping, scarlet, heart-shaped buds.

Zebrina—An erect-growing variety, with a beautiful profusion of pendent leaves. Besides its graceful form, the leaf is distinguished by its glistening silver shading following the leaf, the body being a very dark velvety-green; under side plum color, vein green. Flowers pure white. A beautiful variety.

Rex Begonias

The **Begonia Rex** is the king of foliage plants, far outshowing all others. Give them a soil composed of rich loam, woods earth and sharp sand. They require a warm, moist atmosphere and a shady situation. Do not allow the sun to strike the leaves while wet, and do not over water. Nothing can surpass them for the window or conservatory culture. Rex varieties make immense leaves.

We can furnish Rex Begonias in Six Choice Sorts at 15 cents each; four for 50 cents; set of six for 75 cents.

LARGE FIELD GROWN CARNATIONS

FOR WINTER BLOOMING

No plant is more deservedly popular, after the Rose, than the Carnation. It possesses the attractive quality of fragrance, and fragrance of a most delightful odor. Every window garden should contain at least a few of them. They bloom freely and for a long time if given a cool but sunny position. When subjected to a considerable heat, their stems grow long and slender, bearing a few flowers or none. The spicy, handsome double flowers are enduring, and appear in liberal quantities with the culture recommended above. Our Carnations are all strong field grown plants, established in pot, and have been especially prepared for winter flowering, and will give a great quantity of bloom. Price, 15 cents each; four for 50 cents; ten for \$1.00.

Queen Louise.

Harlowarden.

President Roosevelt—This is a new and splendid high-colored Carnation; flowers extra large and fine, one of the most perfect dark Carnations we have ever seen; deep rich crimson-scarlet, shaded maroon; a strong, healthy grower and free bloomer.

Queen Louise—After a long and severe test, this variety is considered the best pure white Carnation ever introduced. Growing side by side with nearly all the white varieties, it surpasses them in many particulars. It is a great summer bloomer, producing large flowers freely the entire season. It is a strong grower, healthy, with a fine calyx, which does not burst, and very fragrant.

Rose-Pink Enchantress—A lovely rose-pink shade of color put on by the old favorite "Enchantress." The parent's practical wide-awake habit of growth and trustworthy blooming qualities have always made it popular, and this new coloring but adds greatly to an already first-class reputation.

The Beacon—A splendid new red that blooms throughout a long season. Flowers are gracefully formed, and will average from two and three-quarters to three inches in diameter. Color scarlet, with a brightening dash of orange.

Winsor—Clear silvery-pink, a shade intermediate between Enchantress and Lawson, larger than Lawson and of finer form; of excellent constitution.

White Enchantress—One of the best whites yet produced, of pure quality, large size and immense production. Shape and habit closely follow the parent Enchantress.

Eldorado—A yellow of free-blooming habit; strong, vigorous plant, erect stems, finely formed flower of fair size; very free. Petals edged with a narrow band of light pink; almost a Picotee in marking. The flower retains its yellow color under artificial light, unlike most yellow varieties.

Enchantress—A very pleasing shade of light pink, deepening towards the center. When fully developed, over four inches in diameter; very attractive and fine form; stem is strong and stiff; both outdoors and in the house the growth is ideal; very healthy and of vigorous constitution; very early, free and continuous; needs no special culture to develop its magnificent blooms.

Harlowarden—The largest and best of its color, a bright dazzling crimson. Flowers often measure three inches in diameter, and are well supported on long stiff stems. A wonderfully free bloomer, always full of buds.

Mrs. Thos. Lawson—It has created quite a sensation on account of its wonderful size and beautiful color—a deep cerise-pink approaching very near to a brilliant carmine. The habit is strong, free-growing, very vigorous, producing flowers averaging over three inches in diameter.

May Day—Has probably made the best record of any novelty of the season, is popular with the whole trade who have tried it, and has been awarded a gold medal in England, where it is a favorite. A commercial Carnation of an exquisite shade of satin-pink; has a fine stem, strong calyx, and is probably the freest bloomer extant.

Prosperity—This is the largest Carnation ever offered. It is a wonderfully free bloomer, considering the monster size that the flowers attain. White, overlaid with pink, in motives reminding one of the beautiful tints seen in Azaleas.

Double Flowering Hardy Scotch or Sweet May Pinks

These are dwarfier than the Carnation, growing about one foot in height, the colors being of the various shades of maroon, carmine and rose, beautifully laced and banded on white ground; flowers perfectly double, clove-scented, and the plants will stand outdoors year after year, being entirely hardy.

PRICE, 10 CENTS EACH; THREE FOR 25 CENTS.

Abbotsford—Deep carmine, marbled with white.

GRAND NEW FERNS

For the House and Conservatory

No plants are easier to grow or more ornamental for house or conservatory culture than these grand new Ferns. They require very little care or attention, are not troubled with insects or diseases, and produce a finer effect than any other plants you can get for many times their cost. The varieties listed herewith include the newest and most beautiful sorts to date. The ordinary temperature of the living room suits them nicely, and their new growths will soon surprise you with their graceful beauty.

Whitmani.

Nephrolepis Whitmani—An improvement on the Nephrolepis Elegantissima, with still more gracefully divided pinnae, giving the whole plant an airy lace like appearance, while another important point in its favor is the fact that not a single frond has ever reverted to the common Boston Fern. It is of dwarfer and more compact habit than the N. Elegantissima; makes beautiful symmetrical plants even in small sizes, and large specimen plants are beautiful beyond description. Price, nice strong plants, 10 cents each, six for 50 cents; large size, from four-inch pots, 35 cents each, three for \$1.00.

Boston or Fountain Fern.

Nephrolepis Exalta Bostoniensis (The Popular Boston Sword Fern)—In the vicinity of Boston no other plant is used so extensively as this graceful Nephrolepis, which differs from the ordinary Fern in having much longer fronds, which frequently attain a length of four feet. These fronds arch and droop over very gracefully, on account of which it is frequently called the Fountain Fern. Price, nice plants, 10 cents each, six for 50 cents; larger size, 35 cents, three for \$1.00; extra large 50 cents, three for \$1.25.

Nephrolepis Elegantissima Compacta—A dwarf form of Nephrolepis Elegantissima, making dense, bushy, compact growth of ideal habit and shape. It forms a round, symmetrical, compact mass of foliage. One of the most valuable Ferns. Price, 15 cents each, four for 50 cents; 4-inch pots, 40 cents, three for \$1.00.

Pteris Tremula, or Shaking Fern—One of the finest Ferns for house decoration, growing very rapidly and throwing up large, handsome fronds. It makes magnificent specimens, easily grown and very popular. Price, 15 cents each, four for 50 cents; nice, large plants, 30 cents each, four for \$1.00.

Pteris Argyrea—(Silver Fern.)—A very showy Fern with variegated foliage; fronds large, light green, with a broad band of silver-white down the center of each. Very distinct. Price, 15 cents each, four for 50 cents; large plants, 30 cents each, four for \$1.00.

Scotti.

Nephrolepis Scotti—This beautiful and novel Fern is very dwarf, only about half the height of the Boston, and of very much more compact and symmetrical habit. It is without doubt one of the most valuable ornamental plants for house and conservatory decoration that the trade has put out for many years. The wide spreading habit of the Boston is much admired, and is indeed its most valuable feature where a large, spready plant is needed. The Scotti, because of its compact symmetrical habit of growth, is especially adapted for the small window garden where there is not room for large spreading plants. In this respect it is a wonderful improvement over the Boston Fern. 10 cents each, six for 50 cents; large plants, 35 cents, three for \$1.00.

Dwarf Growing FERNS For Dishes

We have grown a large quantity of small Ferns suitable for Fern dishes. The use of ferneries as ornaments for the dinner table is now very general. Nothing makes so fine an ornament, or is so well adapted for the purpose. Price, 10 cents each; three for 25 cents; any seven for 50 cents. Extra large plants, 20 cents each; three for 50c; seven for \$1.00.

Pteris Magnifica.

Pteris Magnifica—Very dwarf. Beautiful crested fronds. Excellent for fern dishes.

Pteris Cretica Alba Lineata—A very handsome Fern, nicely variegated, grows very rapidly into handsome plants.

Pteris Tremula—For description see page 25.

Pteris Wilsonii—An ornamental Fern of unusual merit. One of the most dwarf of this class, having deep green foliage, leaves heavily crested, giving it the appearance of a tassel. A fine addition to the ornamental varieties.

Pteris Wilsonii.

Serrulata.

Serrulata—Hardy, attractive, eight to twelve inches high; long, narrow leaves in dense masses.

Pteris Argyrea, Silver Fern—For description see page 25.

Onychium Japonicum.

Onychium Japonicum—A very beautiful Fern, having long, graceful fronds. The wiry texture of the leaf makes it keep a long time; very useful to cut for vases, etc.

FERNS FOR DISHES—Continued.

Adiantum Cuneatum.

Adiantum Cuneatum—(Maiden Hair Fern.) A very beautiful and graceful Fern, its delicate fronds being much used for cut flower work.

Aspidium Tsussimense—Without question the most valuable of all Ferns yet introduced for fern dishes; of strong but dwarf and graceful habit; of good color and of better keeping quality than any other Fern we know. A clear, good grower and very ornamental.

Selaginella Emiliana.

Moss Fern—(*Selaginella Emiliana*.) An upright growing moss with delicate lace-like foliage. Suitable for fern dishes or for table and house decoration.

Cyrtomium Falcatum—(Holly Fern.) We consider this one of the finest Ferns in cultivation to grow into specimen plants, and while it is coarser than the Tremula Fern, it is very graceful and is becoming very popular. The leaf is a rich, glossy green, and each leaflet is about the shape and size of a Rose leaf. The fronds are fine for cutting on account of their lasting quality.

A Fern Dish Collection.

Asparagus Sprengeri.

The Charming Decorative Plant, **ASPARAGUS SPRENGERI**

Not only is it useful for cutting in sprays for fine cut-flower work, more particularly in connection with large Roses, etc., but grown in suspended pots it makes one of the prettiest decorative house plants we know of. Asparagus Plumosus.

ASPARAGUS PLUMOSUS NANUS

(Lace Fern.) One of the handsomest of our foliage plants. The leaves are a bright green, gracefully arched, and as finely woven as the finest silken mesh. Their lasting quality when cut is remarkable, retaining their freshness for weeks, hence it ranks as the most valuable plant we have for this purpose surpassing Maiden Hair Fern in grace, fineness of texture and richness of color. Price, 10 cents each; three for 25 cents; large plants in four-inch pots, 25 cents each; five for \$1.00.

The Three Leading Winter Flowering Giant Cyclamens

"The Persian Violet"

This genus contains some of our most popular and desirable plants for fall and winter and early spring flowering. They are all neat and dwarf in habit; all have foliage of pretty form and beautiful markings, and the flowers in every case are beautiful, some exquisitely so. The Cyclamen does not need an intense heat, but thrives better in a rather cool, moist atmosphere. The bulbs should be potted in a light, loamy soil with plenty of drainage. The flower, as the name implies, is very similar in form to the large single Violet, but producing from one bulb as many as fifty flowers. There are a great many colors in all, but we have picked three of the best, as described below, which we guarantee to give the finest and largest number of flowers.

Cyclamen Giganteum Album—Pure white.

Each flower is about as large as a silver dollar, in color a beautiful lilac-rose, sparkling as if covered with diamond dust. The upper petal, which is the largest, has a metallic-blue blotch in the center, and in the center of that a small, deep golden-yellow spot. New Single Violet, California—This beautiful Violet has created a decided sensation. It was raised in California, where it was cultivated by the hundreds of acres as cut flowers. Buyers prefer it to all others. It is entirely hardy and of the richest dark blue and very fragrant.

HARDY DOUBLE ENGLISH VIOLET

This Violet is entirely hardy, perfectly double, a deep violet-purple color, and most deliciously fragrant. It surpasses the well known "Marie Louise" Violet in richness of color, being many shades darker, and far excels it in its delightful odor; this is one of its greatest merits. Nothing is more appropriate for cemetery plots than the Hardy Double English Violet. Price, 15 cents each, four for 50 cents.

SMILAX

This very great climber is a great addition to our basket plants, possessing the rare qualities of delicate and tolerably dense foliage and vining habit, admirably adapting it to clinging or drooping, as may be required. For using for a green with cut flowers it has no equal, its hard texture enabling it to keep for several days without wilting after being cut. It is also fine as a parlor or window plant. Price, 8 cents each, four for 25 cents.

=HARDY LILIES=

Orders for Lilies (except Harrisi, Candidum and Longiflorum) cannot be filled before last of November.

LILIES

No garden collection can be complete without the Lily prominently established. With no extraordinary care, Lilies will thrive co-equal with the hardest garden plants, and by arranging a judicious assortment of varieties a continuous succession of flowers may be had from May until November.

One each of the Seven Varieties of Lilies offered on this page for \$1.00.

Lilium Auratum

The Golden-Rayed Lily—This grand summer-flowering sort is now considered the Queen of Lilies. It produces its handsome, richly-colored flowers in large clusters, and blooms profusely from June to October. When expanded, the flowers measure from eight to ten inches in diameter and are composed of six pure white petals, each of which is distinctly striped the whole length with a clear yellow golden band, and thickly studded with rich crimson spots. Gracefully formed, deliciously fragrant. Large, sound bulbs imported direct from Japan. Price, 20 cents each; three for 50 cents.

Speciosum Monstrosum Album

Among the showiest of all Lilies and perhaps the most robust and the most radiantly beautiful. Very fragrant and hardy, with broad flat stems and immense heads of flowers, often fifty flowers in a cluster. No garden complete without some of them. Price, 20 cents each; three for 50 cents.

Lilium Candidum

The old-fashioned pure white garden Lily, also known as Annunciation Lily. One of the hardiest. Flowers snow-white, with heavy yellow stamens and sweetest fragrance. It bears from five to twenty blossoms. It must be planted in the early autumn to succeed well, as it makes its leaf growth at once after planting, and prepares itself for early flowering. The bulbs are sometimes kept in cold storage for spring sales, but never do quite so well. The prices are lower than for many years, and bulbs very fine. Customers will do well to plant a bed of twenty-five or more for a permanent bed or border. Price, 20 cents each; three bulbs for 50 cents.

Lily Speciosum Rubrum

This is one of the most popular and satisfactory of all Lilies, and is considered by many as the finest of all Lilies. The flowers are bright crimson and white spotted. Splendid large flowers, borne in clusters; stem two to three feet. Price, 20 cents each; three for 50 cents.

Lily Longiflorum

(Bermuda Grown.) Widely used for forcing for Easter holidays. Its flowers have more substance and last longer in bloom than the Bermuda Lily. Price, 10 cents each; six for 50 cents.

Bermuda Easter Lily.

True Bermuda Easter Lily—Lilium Harrisi

Pure pearly-white, deliciously fragrant, and a remarkable profusion of bloom characterize this charming and celebrated Easter Lily. Without exception, it is one of the most valuable bulbs for winter flowering in the house. A profusion may be had from Christmas until spring—with a dozen bulbs or more. Bulbs after flowering can be rested a couple of months by withholding water, and will then produce another crop. It is a magnificent variety for church decoration at Easter. Price, strong bulbs, 15 cents each; four for 50 cents; large size, 25 cents each; five for \$1.00.

Lily of the Valley.

Lily of the Valley

The Lily of the Valley will thrive in any soil and throw up its beautiful, modest, fragrant white bells in the out-of-the-way nooks, the shady spots, the neglected corners, where bolder and more ambitious flowers would scorn to bloom. Will also adapt itself to pot culture in winter, its delicate, permeating fragrance making it especially desirable. They are also forced in immense quantities by florists, but they are the most charming when grown in large patches, in partially shaded localities around the lawn near the borders of streams, lakes, etc., being perfectly hardy. Price, 5 cents each; 35 cents per dozen; \$2.00 per hundred.

NOTE—Lily of the Valley pips (bulbs) do not arrive from the foreign grower until the latter part of November. Orders for them will be held until that time.

Splendid Double Herbaceous Peonies

"Aristocrat of the Flowers"

That Herbaceous Peonies are as fine and effective in their way as Rhododendrons or Roses is now being generally recognized. They are hardier and more easily cultivated than either of their rivals, and are being used in the same way for bold displays of color.

Peonies today show a wonderful improvement over former years. There is something of true magnificence about this aristocrat of the flowers, and in large mass plantings they produce an effect that you remember—great, gorgeous blossoms, daintily dyed with the most exquisite shades, from white to the deepest reds. They are deliciously fragrant, and for effective decorations, especially on a large scale, are totally unsurpassed. Their flowers are very lasting; bloom several weeks in the spring. Do not expect too much of them the first year. They are a little slow in establishing themselves.

CULTURE—They will grow anywhere, reasonably speaking—though they do best in rich, deep soil and a sunny position, they thrive equally well in partial shade. Plenty of water during the growing is an added stimulus. They are perfectly hardy, require no protection and are not troubled with insects or disease.

Hardy Ornamental Climbing Vines

Hardy Clematis

Many failures in the growing of Clematis are the result of too shallow planting; the crown of the roots should be set at least three inches below the surface of the soil. They delight in a rich, cool soil in an open, sunny position.

Jackmani—The flowers when fully expanded, are from four to six inches in diameter; intensely violet-purple, with a rich velvety appearance and distinctly veined. Flowers continuously from July until cut off by frosts. Large three-year-old roots, 40 cents each, three for \$1.00.

Henryi—Fine large creamy-white flowers. A strong grower and very hardy; one of the best white varieties; a perpetual bloomer. Price, large three-year-old roots, 40 cents each, three for \$1.00.

Honeysuckles

The dear old Honeysuckle is never out of place, at the rich man's mansion or the poor man's cottage. For a cheap, hardy, robust yet lovely vine, it is the chief standby.

Clematis Paniculata.

AMPELOPSIS VEITCHI

This vine also goes under the name of "Japanese Ivy" and "Boston Ivy." It clings readily to any surface, where it will spread its fairy-like tracery of infinite small leaflets and the accompanying circular suckers by which it is attached. Its color, very bright in autumn, is delicate green in summer. Price, 30 cents each, three strong plants for 75 cents.

KUDZU VINE

Pueraria Thunbergiana—A twining vine of remarkable rapid growth, attaining a length of forty to fifty feet in one season from established roots which are hardy, though the vine dies down every winter in the North. Foliage large and lobed, purple pea-shaped flowers in clusters, borne late in the season. A fine vine for arbors, verandas, etc. Price, 20c each, 3 for 50c.

CHINESE BLUE WISTERIA

Flowers in clusters; pale blue; sometimes gives a second crop of flowers in the fall. This is one of the most popular of our hardy vines, growing very rapidly, climbing to a height of fifty feet or more. It flowers in early spring in long, drooping racemes, resembling in size and shape a bunch of grapes. Price, 20 cents each.

CLEMATIS PANICULTA

We cannot well say too much in praise of this vine. A clean, thrifty, robust-growing vine of graceful habit, with attractive glossy foliage, covered in August and September with a sheet of clustered snow-white bloom of the most delicious fragrance. No other vine so completely covers itself with flowers. An arbor or portico over which this Clematis is trained is a wall of white for the time being and what makes it the more striking is that nearly all other vines have ceased blooming at that time. Perfectly hardy, grow rapidly. Price, field-grown plants, 15c each, 3 for 40c; extra large size, 30c each, 3 for 75c.

Hardy Ornamental Flowering Shrubs

HYDRANGEA

Hydrangea Paniculata Grandiflora—This is one of the most hardy shrubs in cultivation. It attains a height of three or four feet, and is perfectly hardy in all parts of the country. The flowers are white, borne in immense pyramidal panicles nearly a foot in length. It commences flowering in July and continues until November. The plant should be cut back every spring at least one-half of the last season's growth, as the flowers are borne on new wood and are much finer when the plants are treated in this way. This is the finest flowering shrub for cemetery planting we know of. Price, 15 cents each; large field plants, 35 cents.

BERBERRY THUNBERGIANA

Inimitably neat and dense of growth, yet quite graceful because of its drooping branches. Yellow flowers are followed by vivid scarlet fruits, the foliage changing in fall to scarlet and gold. Very useful and highly ornamental shrub for hedging. Price, 15 cents each, four for 50 cents.

FALL PLANTING—Some object to fall planting, but it has been fully demonstrated that there is no better time in the whole year to plant fruit than October, November and December. The trees and plants become established in the ground, the roots callous over, and when spring comes they commence growth at once. If you are thinking of planting, do not fail to order at once.

Our Shipping Season for Nursery Stock Opens About October 10th.

All Fruits Must Be Sent by Express, Unless Otherwise Stated

When offered by mail, postage is paid by us; if by express or freight, charges are to be paid by purchaser; but larger stock will usually be sent.

BRIGHTON (red), WYOMING (red), NIAGARA (white), CHAMPION (blue), CONCORD (blue), CAMPBELL'S EARLY (blue), MOORE'S EARLY (blue), WORDEN (blue).

Our price is so low that everyone buys them. It is the most liberal fruit offer we ever made. Send order at once.

Price, one good, strong, one-year vine of each, postpaid, only 75 cents; if extra heavy vines are wanted by express, we can send the largest size for only \$1.25 for the collection, or by mail for \$1.50.
